

Maryland
Hospital Association

February 13, 2023

To: The Honorable Melony G. Griffith, Chair, Senate Finance Committee

Re: Letter of Support- Senate Bill 255- Public Health - Home- and Community-Based Services for Children and Youth

Dear Chair Griffith:

On behalf of the Maryland Hospital Association's (MHA) 60 member hospitals and health systems, we appreciate the opportunity to comment on Senate Bill 255

Across the United States, 1 in 6 children are diagnosed with a mental, behavioral, or developmental disorder. Many of these children lack access to services and resources necessary for everyday functioning. Maryland hospitals and other healthcare partners continue to work tirelessly to provide essential in-patient and out-patient care for Maryland youth.

SB 255 incorporates vital improvements to the existing model of delivering behavioral health care in Maryland. In particular, the bill provides reimbursement for essential wraparound services delivered by care coordinators. SB 255 also requires reimbursement for intensive in-home services, family therapy, and other family-centered treatments. These provisions ensure access to often inaccessible, but much needed behavioral health services.

Finally, SB 255 requires the Governor to set aside funds in the annual budget to support mental health and behavioral health services for youth. By expanding eligibility criteria and allocating funds for these services, children will be afforded treatment early on and will maintain treatment stability as they grow into adulthood.

With the help of SB 255, hospitals, and health systems alike, can collaborate to positively transform the existing behavioral health landscape specifically relating to Maryland youth.

For these reasons, we request a favorable report on SB 255.
